

WTF FILE 001: The Mudflood Theory

The Claim

A cataclysmic mudflood event - between the 1600s and 1800s - swept across the world, burying entire cities in metres of soil and sediment.

Some say it was natural. Others claim it was engineered.

Either way, the result was the erasure of a previous advanced civilisation.

The Evidence

- Buried buildings - from London to New York, Paris to Moscow, entire ground floors lie beneath modern street level.
- Windows and doors underground - not basements, but architectural features buried in earth.
- Star forts - advanced geometric military structures with no clear origin or modern explanation.
- The great fires and expositions - suspiciously timed "accidents" that cleared entire districts and rewritten records.
- No clear explanation - mainstream history avoids the topic or calls it coincidence.

Why It Matters

If the mudflood happened - and it was covered up - then:

- Our timeline is a fabrication
- Our world is built on the ruins of a forgotten age
- We are the survivors of a reset no one talks about

This isn't just about buried bricks.

WTF FILE 001: The Mudflood Theory

It's about buried truth.
